

Effective corporate management thanks to Jira's and Confluence's integrated management system

Goals and processes, that are defined in isolated management systems like project, security and quality management can possibly contradict each other. An integrated management system (IMS) unites all systems and processes of an enterprise in a complete framework, so that the enterprise can act based on a uniform and well-coordinated process map.

With the aid of Jira and Confluence, we integrate various systems and processes like risk management, crisis management, business continuity management, quality management and internal control system, so that you can meet all required norms like ISO 9001, ISO 27001, ISO 31000, ISO 22301 and others.

Atlassian functionality concerning the IMS

- integrated process map
- intelligent tree structure for document management
- individual adjustability of all relevant subject areas
- basis for weak spot analysis
- functions for an effective internal communication
- automated notifications when changes are made
- numerous predefined reports, statistics, and diagrams

Our services for your IMS with Atlassian

- consulting concerning licensing and acquisition of your Atlassian licenses
- consulting and support from piloting to roll-out
- installation and implementation of Atlassian products
- masks, arrays, and workflows adjusted to your requirements
- definition and implementation of the roll and authorization concept
- scalable configuration of the Atlassian tools and add-ons
- implementation of all necessary reports and dashboards
- integration of Atlassian products into existing intranet solutions, realization of linkage to databases
- trainings and workshops for users, key users, and administrators

Your advantages

- transparent and complete overview of all documents and processes
- central information source for all employees
- automated communication guarantees that everyone is informed when changes are made
- efficient instrument for corporate management and basis of every certification
